

## 97.00X | Squeegee Black/Orange

**iSEE2**

### TOTAL TOOLS | Application

#### ABOUT

We offer two different hardnesses of the standard rectangle squeegees with rounded edges. 97.002 | Squeegee Black H is the harder squeegee for standard applications. 97.001 | Squeegee Orange S is a softer squeegee that is ideal for tricky areas such as 3D applications, deep corrugations and curved applications like car bumpers. Also, for more sensitive finishes such as carbon and (brushed) metallic films we suggest using the softer squeegee because it is less likely to leave scratches.

We recommend combining our squeegee with the [97.005 | Self-adhesive Felt](#) or [97.006 | Self-Adhesive Alcantara](#) to cover the edge and corners of the squeegee.

#### Typical applications:

**Hard:** for standard applications.

**Soft:** for tricky areas, deep corrugations, curved applications, sensitive finishes.

#### FEATURES

- ✓ STANDARD SIZE 10 CM (4")
- ✓ EASY GRIP SIZE
- ✓ SOFT OR HARD SQUEEGEE
