

70.001N | Ultra Clear

TOTAL WRAP | PVC PPF

iSee2

ABOUT

Super clear is a transparent PVC film, used to wrap and protect vehicles. The soft hybrid vinyl & adhesive system offers very good conformability, which allows easy application even in difficult areas and deep corrugations. Although considered as a more economical choice when compared to our high-end PolyUrethane films, Super Clear will deliver a durable protection against UV damage, stone chipping and minor scratching.
