

## 51.000N | Total Erazé Matt Clear

### TOTAL DECO | Whiteboard Films

### ABOUT

Total Erazé Matt Clear is a matt transparent PVC film used to create custom whiteboards by laminating this product on printed vinyls, walls, cardboards,... The low energy lacquer on this film ensures clean and effortless removal of the ink used in whiteboard markers, while the anti-glare topcoat makes this whiteboard film the ideal solution when used in combination with a beamer. Total Erazé Matt Clear is very easy to apply thanks to the thickness of the film (100 micron). In order to create custom whiteboards, we strongly recommend combining Total Erazé Matt Clear with our **Total Mark print films**. We encourage to use our **97.011 | Erazé Marker Black** or, when using different markers, to consult the 'Total Erazé marker compatibility list' on our website.

#### Typical applications:

Meeting and conference rooms, schools and universities, offices, hospitals, sports clubs, bars and restaurants, ...
